Around the globe, young adults seek new opportunities as business owners to jump-start their careers and contribute to their local economies.

As part of EDC’s Work Ready Now (WRN) program, WRN Biz builds youths’ core skills in business planning, business start-up, and ongoing business management. WRN Biz also helps young people develop the skills and mindset needed to be successful entrepreneurs, including creativity, critical thinking, perseverance, vision, and confidence.

Through training, structured coaching, and market facilitation strategies, youth start, build, and grow their own businesses to meet the needs of their local markets.
